BRUNOTIR

Design & Build Logistics

In view of its expertise and experience in the designing and building of logistics centres, Brunotir commissioned Garcia, Garcia to develop its new facilities.

The new Brunotir centre includes two separate buildings, as well as support facilities for the company:

- Building comprising 2 blocks for Administrative areas and Logistics Store/Warehouse.
- Building for maintenance and cleaning workshop.
- Support Areas - Filling station and machine room.

In addition, there is also a 17,000 m2 parking area, with capacity for 100 heavy goods vehicles.
