

GARCIA GARCIA
DESIGN & BUILD

CENTRO PAROQUIAL

Design & Build Residential

This reconstruction and enlargement of social facilities, with a significant impact on the region, enabled a new service for the elderly to be created.

The reconstruction of the Parish Centre reflected all the excellence that services for children and the elderly require, with the creation of welcoming, comfortable and safe spaces.

Garcia, Garcia contributed to the final quality of this project with all its experience, in line with its policies and mission: customer satisfaction, professionalism and rigorous standards.

This rehabilitation project, undertaken under the new fire-safety regulations, involved adaptation of the existing building to meet the new fire-safety standards. This entailed additional requirements in terms of technical solutions, layout and the partitioning of spaces.
