

GARCIA GARCIA
DESIGN & BUILD

FAPOMED

Construction Commercial

The new facility covers an area of 7,500 m² and includes production zones, storage areas, and laboratories, with a focus on the implementation of advanced technological solutions and high energy efficiency. The project, awarded to Garcia Garcia, was developed under a Design & Build model and reinforces the company's commitment to innovation, quality, and sustainability while simultaneously ensuring operational and environmental comfort.

One of the main challenges of the project was maintaining the plant's industrial activity during the expansion works. The infrastructure also includes technical solutions aimed at safety and environmental protection, such as an air quality control system, cleanrooms with controlled climate, and a modern industrial waste treatment station.

YEAR OF CONSTRUCTION: 2025
