GUIMARÃES VETERINARY HOSPITAL

Design & Build Services

The Hospital Veterinário de Guimarães (HVG) is a reference unit in northern Portugal, designed from scratch to ensure animal well-being and clinical excellence.

Covering about 1,100 m², the building includes separate waiting rooms and consultation rooms for dogs and cats, a fully equipped surgical block, advanced imaging facilities (X-ray, ultrasound, and CT scan), and five hospitalization areas, including ICU and dedicated isolation wards. The architectural concept emphasizes separate flows, natural light, and visual transparency to maximize comfort, safety, and efficiency. Open 24/7, HVG combines cutting-edge technology with a multidisciplinary approach, making it a modern and functional space for animals, owners, and professionals.
