

GARCIA GARCIA
DESIGN & BUILD

KORBER

Design & Build Logistics

Garcia Garcia is responsible for the construction of Körber's new industrial facility, located in the Ermida Industrial Park, Santo Tirso, Portugal. This project represents a strategic investment by the German multinational, strengthening its innovation and production capabilities in the automation and supply chain solutions sector.

With a gross construction area of 11,400 sqm, the new facility has been designed to integrate manufacturing, Research & Development (R&D), testing areas and a state-of-the-art technology showroom, bringing together operations currently spread across several locations. The building has been developed to meet high standards of sustainability and energy efficiency and is targeted to achieve BREEAM Excellent certification.

More than a new manufacturing facility, this investment will contribute to the creation of more than 400 highly qualified jobs, fostering technological innovation and enhancing the region's industrial
