

GARCIA GARCIA
DESIGN & BUILD

ROBOBECK

Design & Build Commercial

Beck Automation awarded Garcia, Garcia its new project in Portugal, striving to increase its production capacity and thus empower access to new markets.

The new industrial unit stands out for its aesthetic modernity and simple lines, marked by details that lead back to the corporate identity. In functional terms, the building will comprise a single block, functionally divided into two areas, namely production and administrative/staff. The building was conceived in order to promote the versatility of the space, allowing to easily alter the layout of machinery and work stations.

It should also be noted that the building is equipped with an energy efficiency system, through photovoltaic energy production, which will enable the use of solar energy to decrease its environmental impact and reduce energy bills.

YEAR OF CONSTRUCTION: 2021

TOTAL FLOOR AREA: 1 700 m²

LOCATION: Barcelos

LEAD TIME : 06 months
