DESIGN & BUILD

STEEP PLASTIQUE MOROCCO

Design & Build Industrial

After the success of the project in Portugal, the French multinational invited GG to develop a Design & Build project for its new industrial unit in the Kenitra Free Zone.

The development of the project in Morocco has benefited from all the experience and know-how of GG in this type of project, allowing the rapid implementation of a modern industrial building and adjusted to the local needs of the client.

The building meets the most demanding standards of Steep Plastique and the automotive industry, allowing the production of parts for the major automotive manufacturers.
