UCHIYAMA

Construction Industrial

GG was the partner chosen by the Japanese group Uchiyama to enlarge its manufacturing plant in Portugal.

Uchiyama manufactures parts for the automotive industry and the aim of the project was to increase its production and storage capacity. For this purpose, the existing building was extended, with the construction of two new areas (2,035 m² for storage and shipping and 280 m² for the new staff block) and the construction of a new 4,845 m² independent building for manufacturing and production areas. All the work was carried out with the factory in operation, having been planned and executed so as to reduce its impact on the company's normal activities.

The expansion of the area of the existing building intended for storage was completed in only four months, in order to ensure that Uchiyama's more urgent needs could be met.

YEAR OF CONSTRUCTION: 2016

TOTAL FLOOR AREA: 7.160 m²

PRODUCTION AREA: 6.880 m²

ADMINISTRATIVE AND SOCIAL AREA: 280 m²

LOCATION: Viana do Castelo

LEAD TIME : 8 Months
